

MedicalDirector – No Cervical Screening Result (Pap) Recorded

This search will extract all active female patients aged 18-69 years that have no cervical screening (Pap test) recorded in MedicalDirector

Note: Pap test data must be entered in MedicalDirector as follows: The test result must appear in the Pap Test tab (ie this must be manually added from either the Holding File or the Pap Test screen).

To run the query:

From the Main screen in Medical Director: (with no patient record open):

1. Select Search, then Pap Test Results

- 2. Select 'No Recorded Smears' radio button.
- Use the drop down box to select dates for 'Born Between' . This will allow you to capture all women aged between 18 and 69 years.
- Note: To edit the year, click on the year in the date field and type over it.
- 4. Select 'Search'
- To print the list of patients that match the query, Select the 'Print' button at the bottom of the screen.
